MAXAVA HOSTEDR

When customers need a turnkey solution for Disaster Recovery as a Service (DRaaS) we offer Maxava HostedDR – a unique combination of DR-specific hardware, software and services provided by certified Maxava OEM partners. This solution is perfect for clients who do not want to invest in refreshing or acquiring backup Hardware, Storage or Data Center costs. Special options allow for live migrations to new Power Systems without the risk and cost of activity interruption.

When partners need to provide a turnkey solution for Disaster Recovery as a Service (DRaaS) we offer HostedDR – a unique combination of DR-specific hardware, software and services.

This solution is perfect when partners and clients do not want to invest in refreshing or adding onsite Hardware Infrastructure or Data Center costs – be it for compliance or financial purposes.
